Russian stamps of 1909-18 were privately overprinted as above in red, blue or black by a group of Entente officers working with Russian soldiers returning from Persia. Azerbaijan was not occupied by the Allies. There is evidence that existing covers (some seemingly postmarked at Baku, dated Oct. 19, 1917, and at Tabriz, Russian Consulate, Apr. 25, 1917) are fakes.

AZORES

ˈā-ˌzōrz

LOCATION — Group of islands in the North Atlantic Ocean, due west of Portugal
AREA — 922 sq. mi.
POP. — 253,935 (1930)
CAPITAL — Ponta Delgada

Azores stamps were supplanted by those of Portugal in 1931.

In 1934-45, #RA5-RA11, RAJ1-RAJ4, and many stamps between #155-223 were used for regular postage in Portugal.

The Azores were declared an autonomous, or self-governing, region of Portugal in 1976. See Portugal for issues since 1980.

LOCATION — A group of about 700 islands and 2,000 rocks in the West Indies, off the coast of Florida. Only 30 islands are inhabited.
GOVT. — Independent state in British Commonwealth
AREA — 5,382 sq. mi.
POP. — 283,705 (1999 est.)
CAPITAL — Nassau

The principal island, on which the capital is located, is New Providence. The Bahamas obtained internal self-government on January 7, 1964, and independence on July 10, 1973.

12 Pence = 1 Shilling
20 Shillings = 1 Pound
100 Cents = 1 Dollar (1966)

Catalogue values for unused stamps in this country are for Never Hinged items, beginning with Scott 130, and Scott C1 in the air post section.

Values for unused stamps are for examples with original gum as defined in the catalogue introduction. Very fine examples of Nos. 2-26 will have perforations touching the design or frameline on at least one side due to the narrow spacing of the stamps on the plates. Stamps with perfs clear of the design or framelines on all four sides are extremely scarce and will command higher prices.

Pen cancellations usually indicate revenue use. Such stamps sell for much less than postally canceled copies. Beware of stamps with revenue or pen cancellations removed and forged postal cancellations added.

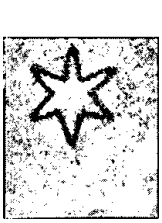
20 Shillings = 1 Pound
100 Cents = 1 Dollar (1950)

Catalogue values for unused stamps in this country are for Never Hinged items, beginning with Scott 207 in the regular postage section, Scott B2 in the semi-postal section and Scott J1 in the postage due section.

Watermarks



Wmk. 5 — Small Star

Wmk. 6 — Large Star

Values for unused stamps are for examples with original gum as defined in the catalogue introduction. Very fine examples of Nos. 10-42a, 44-59a will have perforations touching the design on at least one side due to the narrow spacing of the stamps on the plates and imperfect perforation methods. Stamps with perfs clear of the design on all four sides are extremely scarce and will command higher prices.

To provide denominations created by a reduction in postal rates, the Government produced #365-367 by typographed surcharge. Also, each post office was authorized on May 20, 1946, to surcharge its stock of 1.50fr, 2fr and 5fr stamps "-10 percent." Hundreds of types and sizes of this surcharge exist, both hand-stamped and typographed. These include the "1,35," "1,80" and "4,50" applied at Ghislenghien.

Beginning with Scott 601, Benin again surcharged stamps of Dahomey with a variety of surcharges. While the listings that follow contain more than 80 surcharged stamps, the Scott editors still need to examine more than 60 other stamps, in order to list all of those that are currently known to exist.

The size and location of the surcharge varies from stamp to stamp. The type face used in the surcharge may also vary from issue to issue.

X6 PM2 (1p) red *38,500.*

Nos. X1-X3 were produced and used by Postmaster William B. Perot of Hamilton. No. X4 is attributed to Postmaster James H. Thies of St. George's.

Only a few of each stamp exist. Values reflect actual sales figures for stamps in the condition in which they are found.

GENERAL ISSUES

Values for unused stamps are for examples with original gum as defined in the catalogue introduction. Very fine examples of Nos. 1-1a, 2-15b will have perforations touching the design (or framelines where applicable) on at least one side due to the narrow spacing of the stamps on the plates. Stamps with perfs clear of the design on all four sides are scarce and will command higher prices.

BOLIVIA

bə-'li-vē-ə

LOCATION — Central South America, separated from the Pacific Ocean by Chile and Peru.
GOVT. — Republic
AREA — 424,165 sq. mi.
POP. — 7,949,933 (1998 est.)
CAPITAL — Sucre (La Paz is the actual seat of government).

100 Centavos = 1 Boliviano
100 Centavos = 1 Peso Boliviano (1963)
100 Centavos = 1 Boliviano (1987)

Catalogue values for unused stamps in this country are for Never Hinged items, beginning with Scott 308 in the regular postage section, Scott C112 in the airpost section, Scott RA5 in the postal tax section, and Scott RAC1 in airpost postal tax section.

On Feb. 21, 1863, the Bolivian Government decreed contracts for carrying the mails should be let to the highest bidder, the service to commence on the day the bid was accepted, and stamps used for the payment of postage. On Mar. 18, the contract was awarded to Sr. Justiniano Garcia and was in effect until Apr. 29, 1863, when it was rescinded. Stamps in the form illustrated above were prepared in denominations of ½, 1, 2 and 4 reales. All values exist in black and in blue. The blue are twice as scarce as the black. Value, black, $75 each.

It is said that used copies exist on covers, but the authenticity of these covers remains to be established.

72 varieties of each of the 5c, 78 varieties of the 10c, 30 varieties of each of the 50c and 100c.

The plate of the 5c stamps was entirely reengraved 4 times and retouched at least 6 times. Various states of the plate have distinguishing characteristics, each of which is typical of most, though not all the stamps in a sheet. These characteristics (usually termed types) are found in the shading lines at the right side of the globe. a, vertical and diagonal lines. b, diagonal lines only. c, diagonal and horizontal with traces of vertical lines. d, diagonal and horizontal lines. e, horizontal lines only. f, no lines except the curved ones forming the outlines of the globe.

Stamps of type A9 on thick paper were surreptitiously printed in Paris on the order of an official and without government authorization. Some of these stamps were substituted for part of a shipment of stamps on thin paper, which had been printed in London on government order.

When the thick paper stamps reached Bolivia they were at first repudiated but afterwards were allowed to do postal duty. A large quantity of the thick paper stamps were fraudulently canceled in Paris with a cancellation of heavy bars forming an oval.

To be legitimate, copies of the thick paper stamps must have genuine cancellations of Bolivia. Value, on cover, each $125.

The 10c blue on thick paper is not known to have been issued.

Some copies of Nos. 40-46 show part of a papermakers' watermark "1011."

AREA — 19,768 sq. mi.
POP. — 2,000,000 (approx. 1918)
CAPITAL — Sarajevo

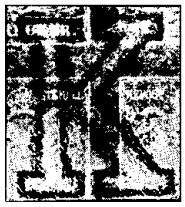
Watermark



Wmk. 91 — BRIEF-MARKEN or (from 1890) ZEITUNGS-MARKEN in Double-lined Capitals, Across the Sheet

Coat of Arms — A1

Type I — The heraldic eaglets on the right side of the escutcheon are entirely blank. The eye of the lion is indicated by a very small dot, which sometimes fails to print.

Type II — There is a colored line across the lowest eaglet. A similar line sometimes appears on the middle eaglet. The eye of the lion is formed by a large dot which touches the outline of the head above it.

Type III — The eaglets and eye of the lion are similar to type I. Each tail feather of the large eagle has two lines of shading and the lowest feather does not touch the curved line below it. In types I and II there are several shading lines in these feathers, and the lowest feather touches the curved line.

Varieties of the Numerals

2 NOVCICA:
A — The "2" has curved tail. All are type I.
B — The "2" has straight tail. All are type II.

15 NOVCICA:
C — The serif of the "1" is short and forms a wide angle with the vertical stroke.
D — The serif of the "1" forms an acute angle with the vertical stroke.
The numerals of the 5n were retouched several times and show minor differences, especially in the flag.

Other Varieties

½ NOVCICA:
There is a black dot between the curved ends of the ornaments near the lower spandrels.
G — This dot touches the curve at its right. Stamps of this (1st) printing are litho.
H — This dot stands clear of the curved lines. Stamps of this (2nd) printing are typo.

10 NOVCICA:
Ten stamps in each sheet of type II show a small cross in the upper section of the right side of the escutcheon.

2	A1	60r	black	600.	240.
3	A1	90r	black	3,000.	1,200.

Nos. 1-3 were issued with gum, but very few unused examples retain even a trace of their original gum. Copies with original gum command substantial premiums.

Fine impressions are true black and have background lathework complete. Intermediate impressions are grayish black and have weaker lathework in the background. These sell for somewhat less than fine impressions. Worn impressions have white areas in the background surrounding the numerals due to plate wear affecting especially the lathework. These examples sell for somewhat less than intermediate impressions.

Most examples of Nos. 1-3 also exist on white paper, usually thin and somewhat translucent. Such examples are scarce and command premiums.
